

Annual Meeting of Ratepayers (To-morrow) Friday Night at 8 p.m.

Fire Boss Fined \$50 and Costs for Breaking Mine Regulations

Maximum Fine in Magistrate's Court—Injury to Miner Owing to Carelessness of Boss

Fire Boss Purdy, who on Jan. 9 was in charge of a working party in McGillivray mine, when Joe Panek was seriously injured and lost one eye as the result of the premature firing of a "hot" in blasting rock, was on Friday before Magistrate Gresham with an infraction of the Mines Act. It is against the mining regulations to allow other than a fire boss to couple up what are termed cartridges. The fire boss' duty is to attend to this, and Panek was injured by Purdy firing the shot while Panek was still on the spot where the charge had been laid.

The charge is exploded by the current from an electric current in charge of the fire boss. Purdy was fined \$50 and costs, the maximum allowed in a magistrate's court. S. G. Bannan, barrister, of Blairmore, defended Purdy, and pleaded for leniency, as the penalty also carries a sentence if deemed necessary by the court.

Purdy had worked here only a short time before the accident, coming here from Bellevue, and he has had many years experience in Alberta mines.

Panek is still in Holy Cross hospital, and E. Leduc drove Mrs. Panek up there at the week end to visit him. He is making steady progress, but his return will be delayed owing to an ulcer forming on his uninjured eye.

Catholic Church Ladies Aid

The ladies of Holy Ghost church have organized with the following officers: Mrs. S. Janostak, president; Mrs. Serak, vice president; Miss Lottie Nicholas, secretary, treasurer.

A whist drive will probably be held in the old Catholic school before the Lenten season opens, and the ladies are planning a St. Patrick's concert on March 17 and a bazaar during the summer months.

St. Alban's concert party will hold a grand concert in the parish hall, on Wed. Feb. 4 at 8 p.m. Plays, laughs, jokes, a bag full of 'em for 25c.

Some Twenty Years Ago

The worst snowstorm in years descended upon the Canadian country to the north of Spokane. Six feet of snow fell at Cranbrook. Westbound Spokane train was snowed-in at Colfman. At Fernie three engines pulling a train was stalled at McGillivray for a day and a half. At Crow's Nest temperature dropped to 15 below zero. —Twenty Years Ago, in Spokesman Review.

Children at School and Teacher's Influence

Visiting one of the primary classes of the schools, one gets a glimpse of a class room of bright-faced children, potential citizens being moulded to take their place in national life. They include children of many nationalities, but as they are quite young, by the time they grow into men and women it will be hard to distinguish the children of the foreign-born from the native born.

"Would you like to hear them sing?" asks the teacher. The little ones' faces brighten up and with a lack of self-consciousness, and glances from the corner of their eyes at the unusual visitor, they sing their song of four or five verses, the youngest children perceptibly tiring as they reach the last verse, but determined to be in at the end.

The importance of a teacher's influence is often overlooked or taken too much for granted by parents—an occasional visit to the class rooms is a reminder of how important is that influence.

Clients Reveal Business Gains by Advertising

William Findlay, vice president of Lord & Thomas advertising agency, recently stated: "Several of our advertisers enjoyed peak sales in 1930. These are firms who have judiciously maintained or appropriately increased their advertising appropriations, and whose sales organizations have put fresh effort into their work. They have proven that industry and advertising will make headway over competitors, no matter what the conditions in business may be."

Arthur E. Graham visited Mercoal last week on his regular trip to the collieries there.

To Bring Bermuda Next Door

Already the winter playground of many Canadians, Bermuda will be brought even closer to Canada by the inauguration, January 31st, of a weekly sailing from New York by the Canadian Pacific liner Duchess of York.

The island—or, to be correct—the 365 coral islands that form Bermuda in addition to being the closest summer-weather resort to Canada is famous for illness, golf and bathing.

Canadian professionals from Toronto and Hamilton are familiar faces on two of the many fine

courses of which Bermuda boasts, and excellent bathing both on beaches and in open-air sea-water pools is a feature.

Pictured above are: (1) Captain R. N. Stuart, V.C., D.S.O., commander of the Duchess of York. (2) Coral rock formation on the coast showing the Duchess of Bedford en route to the West Indies. (3) The open-air swimming pool, which is a feature of the Hotel Hamilton, Bermuda's largest hotel. (4) One of the many cays.

A Few Words on the Art of Printing

Printing is an art. It is the art or practice of impressing letters, characters or figures on paper, cloth or material; the business of a printer, typography. The art of letter-press printing, which was invented by Gutenberg at Mainz about the year 1450, is divided into two departments; composition, or the arrangement of the types, and press work, or the taking of impressions from the types so arranged; the workmen are therefore distinguished into two classes, compositors and press-men.

Printing was introduced into England by William Caxton about 1474.

It requires several years training or apprenticeship to become a qualified compositor or pressman, and the printing industry is a highly skilled trade.

ST. ALBAN'S CHURCH

Next Sunday is Septuagesima Sunday. The services will be: 2 p.m. Sunday School.

3 p.m. Adult Bible Class.

3 p.m. Evensong and Sermon.

The 24th Synod of the Diocese of Calgary will convene on Feb. 4. It will open on Feb. 3 with a banquet for clergy and laity in the Alhambra room of the Hudson's Bay Co. Calgary, and the address of the evening will be delivered by Archbishop DePencier, of New Westminster. Delegates from Coleman and Blairmore will attend the Synod, which will be held from Feb. 4 to 8. It is expected that every parish in the Diocese will be fully represented.

Rev. A. S. Partington, Major B. F. Barnes and H. T. Halliwell will be the delegates from Coleman, and T. W. Hills will represent St. Luke's, Blairmore.

St. Alban's vestry held its regular monthly meeting on Monday at the home of Mr. and Mrs. W. L. Borrow.

Teaches Tractor and Grader Efficiency

City and county grader operators, farmers interested in terracing, contractors and their operators in large numbers will attend the tractor school to be conducted by Union Tractor & Harvester Co. Ltd. local "Caterpillar" dealers, February 12 and 13, according to present indications. These men will be shown the proper care and operation of both tractors and graders by lectures and demonstrations with "Caterpillar" tractors and graders.

Talking films showing the various uses of graders in road building, maintenance, terracing and contract work will supplement the demonstrations and lectures.

Irvin Raises a Smile

Irvin Cobb, noted short story writer, always raises a laugh when he deals with something serious. Surgical operations, classical music or art, or anything of a 'highbrow' nature on which he gives the 'low-down' is really funny. Talking of classical music compared with popular or modern music, he said nothing delighted him more than to see John Philip Sousa step to the front of the stage, wave that little baton, and hear a big fat man playing a little thing that looked like a gaspipe, or a small man blowing through something that looked like the deck funnel of a steamship ventilator, with lots of "oom pahs" and rattle and thump of drums.

And, if the truth were told, he imagined that many who affected a liking for something they did not understand were afraid to admit it.

Help for Relief

The hotel-keepers association has donated \$75 to the town council to be used in relieving distress among those who do not come under an employment relief, which has been acknowledged by Mayor Moore.

Thought rules the world; it governs in every walk of life.

Andreschuk Remanded for Trial at Higher Court in Macleod

Grave Nature of Charge Decides Magistrate on Sending Case to Higher Court

M. Andreschuk was given a preliminary hearing on Thursday on a charge of stabbing Albert Binda on Jan. 16 at the corner of Main street and Centre avenue. The affair occurred about 5:30 p.m. He was remanded on \$1,000 bail, to appear for trial at Macleod at the spring sitting of the Supreme Court.

Witnesses heard were Vincent Varnoise, Mike Kish, Paul Charla, also Dr. Delong and Constable Campbell. A.P.P., who gave evidence as to the nature of the wound. J. E. Gillis, barrister, of Blairmore appeared for the defence, and the Crown was represented by Sergeant Jones, A.P.P.

One Thing Brings Up Another In Local Police Court

As a sequel to the foregoing report of court proceedings, Andreschuk instituted prosecution of Binda for assault, claiming that he was molested and punched by Binda before he retaliated. J. E. Gillis conducted the prosecution and R. F. Barnes the defence, the hearing occupying Wednesday and (Continued on Page Twenty)

Town of Coleman

Notice of

Annual Meeting

PUBLIC NOTICE is hereby given that a meeting of the ratepayers of the Town of Coleman will be held in the Council Chamber, on Friday, January 30, 1931, at 8 o'clock p.m., for the purpose of receiving the auditor's report of the finances of the Town up to the preceding 31st day of December, and for the purpose of receiving the reports of the chairmen of the various committees of the council.

Dated at Coleman, Alberta, this 21st day of January, 1931.

JAMES FORD,
Secretary-Treasurer.

Coleman School District

Notice of

Annual Meeting

PUBLIC NOTICE is hereby given that a meeting of the ratepayers of Coleman School District No. 1216 will be held in the Council Chamber, Town of Coleman, on Friday, January 30, 1931, at 8 o'clock p.m., for the purpose of receiving the auditor's report of the finances of the school district up to the preceding 31st day of December, and for the purpose of receiving the reports of the chairmen of the various committees of the trustees.

Dated at Coleman, Alberta, this 13th day of January, 1931.

JAMES FORD,
Secretary-Treasurer.

MODERATION IS ADVICE GIVEN BY BROWNLEE

Calgary, Alta.—Warning against hasty steps to increase Sovietism, or, currency alteration, was delivered by Premier J. E. Brownlee to United Farmers of Alberta in annual session. The U.F.A. party leader counselled ample deliberation of any steps urged by radical forces rising out of unrest, and a revival of "the old crusading spirit" of the farmer.

"Governments in Canada cannot allow agriculture to be destroyed," reminded Mr. Brownlee. "Canada cannot live unless agriculture does." He advised agrarians, however, to "consider whether it is worth while to continue farming, and how."

It requires only a small reduction of acreage and a correspondingly small increase of world consumption to wipe out the bugbear of overproduction, he said.

"What about recession?" asked the premier. "The difficulty in the West is that we have too much wheat. Would you sell it under recession? Where? And what would you sell it for?" He stated, that in some parts of the province propagandists are urging all the good things in the Russian system, and he questioned that their advice should be followed. He told his audience they could have in Alberta anything that is had in Russia, if they deemed it best, "by the simple expedient of your votes."

"Don't think that by some change in Canada's financial policy—currency—we can in one year pass from bad times to good times," warned Mr. Brownlee. He did not wish to suggest that he was satisfied with the Canadian agricultural system, he said, and was not sure that those who are in a position to be trustees for depositors are the best to handle credit.

Creditors pressing for collection would be one of the country's most acute problems if Canada should have 70 to 75-cent wheat next year, Mr. Brownlee believed. He foresaw the need for organized effort to solve this difficulty and to work out a scheme regarding credit arrears to keep farmers on the land.

The government of Alberta is apprehensive of a crash in livestock prices next year, if over-production follows efforts toward mixed farming, Mr. Brownlee averred. He mentioned that he had immediately offered co-operation with the plan of F. W. Beatty, K.C., for a loan fund for aiding livestock purchase, though he did not agree with some aspects of the plan.

If the prairie premiers' proposal for a fixed price for wheat sufficient to prevent loss, but not large enough to increase production, had been accepted by the Dominion government, Mr. Brownlee believes agriculture would have been saved at a cost probably not larger than expenditures already authorized for relief.

Would Ban Beer Parlors

U.F.A. Want All Beer Parlors Abolished in Alberta

Calgary, Alta.—Immediate action to abolish Alberta's beer parlors, either by legislation or by plebiscite, was urged in a resolution passed at the annual convention of United Farmers of Alberta. Both the U.F.A. and the women's section of the organization had previously condemned beer parlors and sought a plebiscite.

The stand of the convention endorsed the request of the Alberta Prohibition Association for abolition of beer parlors, and labelled beer halls as a menace to the social and economic life of the province. "The time has come," stated Norman Priestley, newly elected U.F.A. vice-president, "to strike another blow at this traffic."

Planetoid Approaches Earth

Toronto, Ont.—Eros, a planetoid which comes near the earth approximately every 30 years, is due to make its second appearance, since its discovery in 1868, on the 29th or 30th of this month. Its visit will afford one of the most outstanding opportunities for astronomical research that has occurred since the beginning of the century. Prof. H. R. Kingston, head of the department of mathematics and astronomy, Western University, says.

Sentenced By Court Martial

Devonport, England.—A naval court martial sentenced Able Seaman Benjamin Towel to six months' hard labor and dishonorable discharge from the service in connection with the short-lived trouble aboard the submarine depot ship "Lucia" recently. He was the second enlisted man to be tried. Thirty men were involved.

W. N. A. 1874

Special Flag May Be Used

Rumor Says New Governor-General Will Fly Own Flag
Ottawa, Ont.—While official announcement is lacking, it is rumored here that with the approval of the King the next Governor-General of Canada will fly his own flag, as personal representative of His Majesty.

At present the only flag officially recognized in Canada is the Union Jack.

Cape Town, South Africa.—South Africa already flies its own national flag alongside the Union Jack, and the governor-general is to have his own flag as the personal representative of His Majesty.

The new governor-general is the Earl of Clarendon, and his flag will consist of a blue ground on which is the royal crest in gold, with the words "Union of South Africa" above the crest and the same words in Dutch below it.

His Majesty has given approval for the use of the flag.

CANADA WHEAT SURPLUS DATA IS REVEALED

Ottawa, Ont.—Wheat surpluses in exporting countries of the world are revealed in a statement handed out by the Dominion Bureau of Statistics recently. Canada's surplus is given at 253,000,000 bushels. Other important exporting countries have surpluses which are estimated as follows: Argentina, 200,000,000 bushels; Australia, 165,000,000 bushels; United States, 241,000,000 bushels. The surplus in Russia is not known, according to the statement, but it has been estimated that 1,157,400,000 bushels has been harvested.

The figures given reflect the situation during the month of December as far as foreign statistics are concerned, while the situation in Canada is covered up to the middle of January.

"Surveying world situation from a Canadian viewpoint, no marked increase in demand is visible," the review states. "European countries, apart from France, will not increase their imports to any great extent. It will be remembered, however, that France has undertaken that between seven and nine million bushels of wheat will be imported during the season. From August 1st to December 31st last, the Canadian exports to France amounted to 3,739,877 bushels.

Germany's policy with regard to imports of foreign wheat is identical with that of France, the endeavor being to force consumption of rye as bread and as a mixture with wheat. The net result in these two countries is that native wheat is selling at prices from \$1.87 to \$1.87 per bushel while good North American wheat cannot be imported at the very low price of 65 to 70 cents per bushel."

It is stated in the review that the Argentine surplus will have to be disposed of as soon as possible by account of inadequate processing facilities. At the present time in inclement weather in the Argentine is hindering large exports and also deteriorating qualities. Inadequate storage facilities are also the case in Australia which will result in that country selling in the open world market. Australia, however, is also experiencing inclement weather. With respect to Australia, a new outlet has been found in India which is taking large imports from the Antipodes.

With respect to the United States it is stated that that country is not at present a competitor in world markets in spite of large wheat stocks. Russia has forwarded 72,208,000 bushels through Black Sea ports since August 1, but recent export shipments have fallen off. It is forecasted, however, that increased shipments will be forthcoming during the winter.

Non-European countries are expanding their wheat imports, according to the review and continued dry weather in India should mean a better demand for wheat in these countries. The Orient is looked upon as an outlet for Canadian wheat.

The opinion is expressed that with seven months of the crop year remaining, the surplus of 253,000,000 bushels in Canada is not unreasonably high. Attention is drawn to the fact that the five year average export for the seven months ending July 31, was 131,115,554 bushels or 20,159,365 bushels per month. There has been a continued improvement in the exports of wheat and wheat flour during the first five months of the crop year.

Two-thirds of the railways in Switzerland have been electrified.

No Official Calls In Cuba

Change Necessary in Program For Prince Of Wales

Havana.—The Prince of Wales and Prince George, who are making an 18,000-mile tour of Spanish America in behalf of British trade, will not leave their ship when it reaches Havana, January 31.

The British legation has informed President Machado that because of the shortness of time available here and the court mourning for Princess Louise, a change in program had been necessitated which would prevent their paying any official calls in Cuba.

Despatches from their ship, the "Oropesa," which left Vigo, Spain, yesterday morning, say the princes are enjoying their trip and participating in the ship life with other passengers. The "Oropesa's" first stop is at Hamilton, Bermuda.

To Protect Dairy Industry

Empire Council To Be Formed With Headquarters In London, England

London, England.—An empire dairy council with headquarters in London, England, will be formed according to a decision made by the Royal Empire Society.

The main objects of the council will be to co-ordinate the interests of the dairy industry throughout the empire, to take steps to protect the home and overseas empire producers from unfair foreign competition and to deal with immediate and urgent questions affecting butter and cheese.

U. F. A. OFFERS PLAN TO ASSIST THE PRODUCER

Calgary, Alberta.—Request that Canada's government take over the 1930 wheat crop, paying producers in wheat certificates, was entered at the annual convention of United Farmers of Alberta. The certificates, it was proposed, would be redeemable in wheat and receivable in payment of taxes.

Payment in certificates of a price to producers approximating cost of production, was advanced in the resolution advanced by George Bevington, of Wainwright, agrarian authority on finance. Actually, explained Mr. Bevington, the wheat certificates would be "read" the dollar, not necessarily based for redemption on wheat, but good outside Canada for any commodity produced in the Dominion.

William Irvine, M.P. for Wetaskiwin, associated himself with Mr. Bevington in the resolution, which was approved unanimously by the delegates representing more than 15,000 Alberta farmers. Other important resolutions sought an early parity of wheat exporting countries to seek stabilized wheat production and export prices, and a packers' and livestock men's meet to gain an agreement with Britain for regular monthly minimum shipment of livestock and dairy products.

The proposals were contained in a lengthy memorandum from the U.F.A. board of directors entirely after a full day of debate. The document, as supported by the convention, asked tax and interest reduction, farm relief, credit reform, market extension and tariff revision.

MAY COME TO CANADA

Earl of Cromer, who, as Lord Chamberlain, bannet Marc Connelley's play, "The Green Pastures," from English stage, is being persistently mentioned as possible successor to Lord Willingdon as governor-general of Canada.

British Policy In India

People Of India Disposed To Judge New Constitution On Merits

Calcutta, India.—Referring to Prime Minister Ramsay MacDonald's statement at the close of the Indian Conference in London, England, the newspaper "Liberty," which represents some sections of the National Congress, admitted there were passages which revealed the anxiety of the British government to introduce some elements of popular responsibility in the Indian administration.

The newspaper, of which Subhas Chandra Bose, mayor of Calcutta, and president of the Bengal Congress, is a director, said, however, that the people would judge any new constitution by the ordinary test of how far it would ensure responsibility in practice, taking into account the proposed reservations.

Subhas Chandra Bose is at present serving a prison sentence for his activities on behalf of the Nationalists.

Russian Wheat Imports

British Government Holding An Investigation On Question

London, England.—The House of Commons witnessed a brief outburst over the question of imports of wheat from Russia.

In reply to a questioner, Rt. Hon. Christopher Addison, minister of agriculture, said the British government was examining the question of importation of wheat from Russia and its effect on British agriculture. He was unable to say, however, when the British government would issue a statement of the outcome of its inquiry.

Western Exhibition Officers

Winnipeg, Man.—N. W. Kerr, K.C. Brandon, Man., was elected president of the Western Canada Association of Exhibitions at the closing session of the annual convention here. C. M. Baker, Calgary, was named vice-president, and S. W. Johns, Saskatoon, secretary-treasurer.

Gibraltar.—The British battle cruisers, "Renown" and "Tiger," have been placed under quarantine because of an outbreak of influenza among their crews.

WILL VISIT OTTAWA

Photograph above shows Miss Joan Pearson (left), and her cousin, Hon. Nancy Pearson, well known hostess of English society, who will pay a visit to Ottawa during present world tour. Attended by their grandmother, Viscountess Cowdray, they recently visited Los Angeles and will include New Orleans and Palm Beach in their travels.

Hail Insurance Losses

Heavier Last Year

Report States Many Companies In Alberta Forced To Withdraw
Toronto, Ont.—Canadian hail insurance losses were heavier last year than in 1929, but not so heavy as in 1927 and 1928, it was stated here by delegates to the Canadian Hail Insurance Companies' convention.

Several losses in Alberta had caused the withdrawal of many companies from Alberta, delegates said, and unless certain legislation sought by the companies was enacted, many more Alberta companies would be forced to withdraw.

Building New Roads

United States To Spend Huge Sums This Year On Extensive Program

New York.—New roads long enough to circle the globe will be built in the United States by the training muscle of some 300,000 workmen this year at a cost not far short of a billion dollars.

Upwards of 9,000 miles of the approximate 25,000-mile total will be hard surface. This is exclusive of 11 states in which highway commissioners could make no mileage estimates.

Winnipeg May Have More Representatives

Increase Of Two Seats In Provincial House Contemplated

Winnipeg, Man.—Increase in Winnipeg's representation in the provincial government to 12 seats is contemplated by the Bracken administration, it has been learned in authoritative circles. At present the city has 10 seats in the legislature on a basis of proportional representation. The government, it is stated, plans to bring the suburbs of St. James and Kildonan within the city representation, adding two seats.

ADVERSE VOTE DOES NOT END LABOR PARTY

London, England.—Amid the echoes of age-old religious controversies—struck from behind—its own ranks divided—the MacDonald Government was defeated in the House of Commons by a vote of 282 to 249. As the position of the members at the clerk's position, the speaker of the House of Commons told the story of the reverse of a clause of the Education Bill the House was plunged into a commotion with the Conservatives shouting: "Resign, resign."

But although the defeat came in the report stage of its own education bill there was no question of a government resignation. Prime Minister Ramsay MacDonald held the vote did not involve a question of principle. The government would, he said, accept the decision of the House and would proceed with the bill.

At this juncture, Rt. Hon. Winston Churchill, who is sometimes termed the Arch-Conservative, arose to proclaim in scornful accents that Mr. MacDonald was "the greatest living master of falling without hurting himself." The government had been defeated by more than 30 votes yet the prime minister, said Mr. Churchill, had airily announced he intended to go ahead as though nothing had happened.

The Conservatives then attempted to press their advantage by moving the adjournment of the House. But here the Laborites who voted against the government on the education clause intimated that, were the motion pressed, they would again give the government their support. Thereupon the motion to adjourn was dropped and the House proceeded with the bill.

A few hours later the amended bill was passed by a vote of 256 against 238, and now it goes on to the House of Lords.

The defeat of the government came on an amendment moved by John Scurr, Roman Catholic Laborite from Mile End.

The English elementary schools are administered under the dual system of state-owned, or provided schools, and religious, or non-provided schools. The religious schools constitute about two-fifths of the whole and, for the main, owned by the Church of England. The Roman Catholic schools come next in number.

All the schools are state-subsidized but in cases of the non-provided school, the buildings and property of a religious community, are concerned.

FRENCH CABINET RESIGNS OVER WHEAT PRICES

Paris, France.—The French Chamber of Deputies overthrew the government of Premier Theodor Steeg, thereby serving notice that France is not going to pay \$2 a bushel for wheat when it is selling for 80 cents in Chicago and around 60 in Winnipeg.

The cabinet fell by a vote of 293 against 283, after an existence of five and one-half weeks, and straightway prepared its resignation for submission to President Gaston Doumergue. "A government plan to stabilize the price of wheat at \$2 a bushel started the firestorm. When the opposition began gunning for Victor Boret, the minister of agriculture, Premier Steeg staked the life of his entire government in defense and lost by the narrow margin of ten ballots after six weeks of tumultuous even for the French chamber."

The climax came with a vivid talk by Pierre Etienne Flandin, who was minister of commerce in the former government of Andre Tardieu.

Flandin painted a dramatic picture of the high price of wheat and bread in Paris, while the commodity is practically going begging in Canada and the United States. This appeared to make a deep impression on the deputies representing cities so the government which began on December 13 was knocked out on January 22.

The attack was principally against M. Boret, who as minister of agriculture, was responsible for the price fixing plan.

Boret offered to leave the cabinet if that would help matters. But the group finally decided to face the interpretation as a whole and the premier's show of fight astounded parliament, for he was regarded the mildest of politicians.

In Steeg's tenure of a little over a month he received only one vote of confidence. That came on December 19 when he made his ministerial declaration.

Realism Causes Riot

Locomotive On Movie Screen Stamped Villagers

Georovesti, Rumania.—The introduction of motion pictures into this village caused a stampede in which 12 persons were trampled, some of them being seriously injured.

A peasant audience, no member of which ever had seen a movie before, was assembled in the hall to view a picture of a steam locomotive. Suddenly the scene flashed to a locomotive roaring straight down the track. The engine appeared to rush out from the screen into the hall and the sight of this giant monster seeming to come racing run them down was too much for the spectators. They made a wild rush for the door and in the ensuing frenzy all fittings of the building were wrecked.

Canadian Trade Decreased

Unfavorable Balance Shown For "Twelve Months Ending"

Ottawa, Ont.—Canada had an unfavorable balance of trade of \$103,109,126 for the twelve months ending December 31, 1930, according to figures compiled by the Dominion Bureau of Statistics.

There was a falling off in both exports and imports during 1930 as compared with 1929. Imports amounted to \$1,008,479,479, compared with \$1,298,992,692 in 1929. Exports of Canadian goods amounted to \$885,966,366 as compared with \$1,182,412,313 in 1929, and exports of foreign goods to \$19,463,987 compared with \$25,926,117 in 1929.

World's Poultry Congress

Ottawa, Ont.—Word has just been received here of the appointment of F. C. Elford, Dominion poultry husbandman and past president of the World's Poultry Science Association, as a member of the executive named by the government of Italy to carry out arrangements for the fifth world's poultry congress, which is to be held in Rome in 1933.

Report Cromer Refuses Post

London, England.—It was reported unofficially that the Earl of Cromer, Rowland Thomas Baring, had been offered and had refused to accept the governor-generalship of Canada. The report was apparently from a reliable source. Lord Cromer has been Lord Chamberlain since 1922.

No Official Date

Ottawa, Ont.—Rumors in the capital are that parliament will open during the middle week of March. No official announcement however, has been made.

NOTES AND COMMENTS

In making nominations for the town council and school board, men who are independent in thought and action should be selected. Ratepayers should keep in mind that representatives are placed in office to promote the welfare and interests of all the ratepayers, and to administer its affairs in a manner that will benefit the town as a whole.

Nominations should not be made in a haphazard manner. Now is the time to decide who will be candidates; not nomination day. The town's affairs need as careful administration as any business concern. Usually directors of a corporation are chosen whose records prove them to be men of integrity and administrative and executive ability. As the town's business is a part of the business of every ratepayer, the same rule should apply.

Mayor Moore's record of service has shown him to be faithful to his trust and he deserves the support of an energetic and business-like council. See that he gets that support by nominating worthy representatives and working for their election.

Remember that to-morrow evening the annual meetings of town and school-district ratepayers will be held. It is an occasion when every citizen should be present. Usually there is barely sufficient attendance to carry on. Indifference is discouraging to those who give time to local government, and in a sense it is discourteous to those whom the people elect.

"Looking back on a life of loyalty, happy in the past and thrice happy in the present, represent the greatest 'success' in life."

Coleman and other towns in the Crows Nest Pass have had a good season of hockey by teams of the strictly "home-brew" variety. There have been no paid players; the boys have played the game for the love of it, and played it well. This is the reason they have been accorded good support, and the "Crow" League has been given a generous share of publicity on the sport pages of the daily newspapers.

The "Crow" league over a period of several years has been the training ground for quite a number who have been picked up by scouts for the big leagues in Canada and the States. It indicates that the boys of the mining towns have the qualities that are essential in good hockey players, and acts as an incentive to the younger players.

Listening in on the radio to a hockey match broadcast of the Coast Leagues, and hearing former local players' name as setting the "fans" into a frenzy of excitement, or reading of them in the newspapers, who does not experience a thrill of pride and interest in having seen these boys "do their stuff" in the rinks of the Pass towns? Canada may indeed be proud of its hockey players, and they attract attention in sporting circles throughout the world. The fact that 11,000 people in one of the European countries witnessed a game between the Manitoba Grads and a European team demonstrates the appeal that ice hockey makes to people in other countries.

The Leaser, of New Denver, B. C., is a small paper in size, but its editor has lots of "kick." Read this:

"If any of the critics would like to try running a newspaper here The Leaser is for sale on easy terms. We have spent five dollars in the town for every dollar received from it. It is the only village in the province having a newspaper where the school trustees do, their advertising on a fence, the only one where the churches and sporting clubs do their advertising on a bulletin board. It is socially a live village, but Lord, how cheap! The man who would offer the editor a complimentary would either pull it back or have heart failure. When a correspondent anonymously is allowed to make misstatements and lying insinuations in a supposedly reputable newspaper it is time to forget journalistic ethics and reply in kind."

The correspondent referred to sent an anonymous letter to the Nelson News, hence the outburst of the editor of The Leaser.

Here are some figures showing the money spent on liquor purchased at Government stores. From 1924 to 1930 inclusive at Blairmore vendor's store was spent \$308,651.77; in Coleman \$205,664.27; total \$514,316.04. If the Prohibition people were consistent, they would make their attack on the liquor stores and not the beer parlors. Figures on beer sales are not available, but it is safe to say they are small in comparison with the foregoing figures. A man can buy one glass of beer and pass on; at a liquor vendor's he usually purchases the "hard stuff." And that's where the greater evil lies.

Palace Theatre
Special Features

One of the greatest musical romance successes in history is Marilyn Miller in "Sally" at the Palace commencing on Monday. Joe E. Brown and Alexander Gray are in the cast and other favorite stars.

This week end Clara Bow will appear in the First National picture, "Love Among the Millionaires." It is a lively comedy drama.

Dumb Animal Notes

Several star horses around town in a semi-starved condition cause annoyance and excite pity at the same time. They cannot find grass on the hills, consequently they get into gardens where there is a vestige of dry grass, and try to appease their hunger. These horses appear to have been used during the summer, and then cast adrift to rustle during the winter. Another example of ingratitude towards the faithful horse.

In the State of Massachusetts a law has been passed by an overwhelming vote of the people against the use of the cruel steel trap which causes much suffering to dumb animals. Societies for prevention of cruelty to animals have been largely instrumental in creating public opinion and many friends of dumb animals in Canada are agitating for similar measures to introduce more humane methods in trapping fur-bearing animals.

Here and There

(CST) Approximately 29,000 people living in Canada are shareholders in the Canadian Pacific Railway, their number having been increased by over ten thousand during the past year. Many of these are employees of the company, and a large percentage of them are small investors. They have bought at a price with an idea of safety and profitably employing their surplus capital.

On January 15, 1931, the city of Lethbridge, Alberta, was made a point of contact between Winnipeg and Calgary. Lethbridge is a point of considerable potential importance as the probable point from which the air line to the Pacific Coast will commence. Official surveys by technical officers of the Canadian Government Civil Aviation Branch have definitely indicated the route from Lethbridge as the most feasible passage of the Rocky Mountains.

Operating on an equal footing with the fastest system in the world, the Canadian Pacific Grain Quotation Service installed by the Canadian Pacific Telephones was officially opened with New Year and places Winnipeg second to none among the world's brokerage centres. Practically per cent operation of upwards of 80 tape ticker machines, carrying their news with lightning speed, beating all previous records by two-thirds, is announced by W. M. Thompson, manager, western lines, Canadian Pacific Telephones.

An official report shows that at the end of November last, there were 446,676 licensed radios in Canada or about one for every 22 of the population. Ontario leads with 228,480 sets and Quebec next with 17,830 with Winnipeg next with 16,953. It is only ten years since the first programme was broadcast by radio.

Among foodstuffs taken from the sea, the Indians on the coast of British Columbia put seaweed as worth adding to the menu of an epicurean, and in earlier days it was used among them as money also. On the Atlantic Coast of Canada some use has been made of seaweed, in combination with fish oil, in producing fish meal which is a valuable stock food.

What is regarded as one of the principal unorganized industries of Canada is the work in connection with the cultivation, harvesting and sale of blueberries. No modern methods have been yet applied. It totals hundreds of thousands of pounds in volume of production and there are about 600,000 lbs. in cold storage at the present time. Blueberry pie is a desert that even Epicurus himself would have snatched his lips over.

Fish caught in the fresh water lakes of Northern Saskatchewan are now shipped by aeroplane to markets in Eastern Canada and the United States. About 3,000 pounds of whitefish and trout are carried from the north to the south. It is planned to increase the service so that 5,000 pounds can be transported daily to the railhead.

COLEMAN SCHOOL DIST. No. 1216

Annual Financial Statement and Auditor's Report

| RECEIPTS: | | |
|---|-------------|--------------|
| Total Balance on Hand January 1st..... | \$20,144.18 | |

JAMES FORD,
Secretary-Treasurer.

You--

are invited to our

CATERPILLAR

SCHOOL

Feb. 12th--13th
MASONIC HALL
Lethbridge

Months of planning—years of experience—have paved the way for these brief sessions of TELLING—not selling. They are crammed full of information every tractor owner, operator and mechanically interested person can utilize in his own work, to save himself time, money and labor. They are absolutely free. Factory experts will tell you how, through the NEW TALKING MOVIES.

Union Tractor & Harvester
Company, Limited

Retail Merchants---

Put "Pep" and Energy into your business by judicious advertising.

When your neighbor paints his house, you admire his enterprise. When you carry an interesting advertisement in the local paper, he likewise admires your energy, and will be attracted to your store.

Advertising has a far-reaching influence. It has built modern business, and it will do the same good work for any merchant who will give a little time weekly to planning an advertisement.

Honest, persistent effort to attract business will bring results. Experience proves it! Its a very positive fact! Local retailing experience proves it!

Hospital Dance Last Evening Was Grand Success

Splendid co operation, and support was accorded the nurses dance, to raise funds to place a radio set in the hospital, and the matron and nurses wish to thank those who so kindly assisted in making it such a success. Mrs. Woods states: "We appreciate the co operation of all, and wish to specially mention Mr. Mason and his orchestra."

Local News

A meeting will be held in the K. P. hall on Fri., Feb. 6, at 8 p. m., to organize a Caledonian Society. All interested are invited.—Rev. A. E. Larke.

The high wind last Thursday night blew down Antrobus' store electric sign, damaging it and breaking a plate glass window. The lights were out of commission for about ten minutes.

Prize winners at the Rebekah whist drive last Saturday night were Mrs. Emmerson, Mrs. Lediou, Dan McLennan and W. Lonsbury. Quite a large number attended the dance after the whist games were completed.

George Jenkins and Jack Rush-ton tied on Saturday night for the prize at the miniature golf course. In the play off on Monday night Jenkins won with a score of 41 to Rushton's 43. The prize was an electric toaster.

Dr. D. A. McLeod is still a patient in Holy Cross hospital Calgary, where he underwent an operation for trouble of long standing over one of his eyes. Prior to re turning home he intends to visit his brother at Canmore.

An instance of finding property and not returning it to the owner came to the attention of The Journal this week. The name and address of the owner were plainly marked on the article and he could have been easily notified. This incident is mentioned to point out that the law can compel the return of lost property by those finding it, and to inform those who find articles of value that they should notify the police or the newspaper, so that the property may be restored to the owner with as little delay and expense as possible.

Town of Coleman Financial Statement

FOR THE YEAR ENDING DECEMBER 31, 1930

THE MAYOR AND COUNCILLORS,
The Town of Coleman, Alberta.

CALGARY, ALBERTA,
17th January, 1931.

Gentlemen:—

In accordance with your instructions under the provisions of The Town Act 1927, I have audited the books and records of the Town of Coleman for the year 1930, and beg to report that I have obtained all the information I have required and that all my requirements as Auditor have been complied with.

For your information, in addition to completing the printed form furnished by the Department of Municipal Affairs of Alberta, I have prepared the attached Statements:—

1. Cash Statement for year 1930.
2. Revenue Statement for year 1930.
3. Balance Sheet as at 31st December 1930.

The Cash Statement records the details of the cash received and paid out during the year 1930 regardless of what it related to, and this Statement shows that the Town actually paid out \$99.84 more than was collected during the year 1930.

The Revenue Statement deals with the Receipts and Payments that are only chargeable to the year 1930, regardless of whether all the receipts were received in the year, or all the payments made in the year, and this Statement shows that, after allowing for \$3342.36, Depreciation Allowance, the Town operated at a loss of \$972.08 during the year 1930. However these figures also include the Haddin & Miles account of \$1135.35, which while not properly chargeable to 1930 operations yet was not received until after the books were closed for 1929. Further the year 1930 figures include the extra costs for Relief Work during the winter of 1929-1930.

It was not possible to pay off the Local Notes that were due for redemption during the year, but the interest on the notes was duly met.

You will note that through the efforts of the Council the cost of Street Lights has been reduced although during the year there have actually been 13 additional Street Lights operated.

In accordance with the requirements of the Town Act 1927 I have visited the Town of Coleman office four times during the past year, and wish to report that at all times was the work up to date, the cash properly deposited with the Canadian Bank of Commerce, and the books in balance.

In addition to the accounts payable listed in the Liabilities in the Balance Sheet there were about \$200.00 of accounts which had been received by the Secretary after the close of the year 1930 and which had not been authorized for payment by the Council, therefore these accounts were left out of the Balance Sheet for 1930.

Subject to the foregoing, I certify that, in my opinion, the attached Balance Sheet is properly drawn up to show a true and correct view of the affairs of The Town of Coleman as at 31st December 1930 according to the best of my information, the explanations given to me and as shown by the books of The Town.

E. D. BATTRUM, Auditor.

CASH STATEMENT. YEAR 1930.

Keep Cool.

Foreign Minister Briand, of France, when recently taken to task by one of the Nationalist leaders who charged him with lack of firmness in dealing with the existing situation, answered with some show of spirit. "I believe the best service one can render his country just now is by remaining cool."

Another state executive, Marcus Aurelius, gave practically the same counsel in the second century of this era when he said: "Do not be whirled about, but in every movement have respect to justice, and on the occasion of every impression maintain the faculty of understanding." Or, more briefly, keep cool.

The advice to keep cool, says a United States publication, is sound advice to every one of us at the beginning of 1931. True, but it is good advice at all times. The advice will be just as sound at the end of 1931 as at the beginning, and at all time intervening. The two quotations above demonstrate this, inasmuch as the advice tendered by an outstanding statesman of the second century is repeated by one of our leading world statesmen in the twentieth century. The words used may be different, but the meaning is the same.

Do not be whirled about. Keep cool. When the stream of life is flowing evenly toward its destined port or goal, following a well marked channel, with hardly a ripple on the surface, it is comparatively easy to keep cool. There is nothing to whirl us about, and in the resultant life of prosperity we pride ourselves on our strength and buoyancy of the stability and greatness of our country.

But it is when, feeling thus safe from a sense of false security, whether in our individual or national life, we reach the rapids, and rocks of disaster loom up ahead, that we are inclined to be whirled about. Then is the time for cool heads, stout hearts and steady hands. It is then that our strength will be proven, and the stability and greatness of our people and our country established.

In the realm of nature, cyclones and tornadoes result from the impact of hot air currents with cooler currents, the one rising, the other descending. Conflict ensues. So in the realm of world economics, business depressions follow inevitably upon periods of abounding prosperity. Just as heated air becomes inflated, so does man in his business enterprise become puffed up. Both ultimately must be deflated, and it is in the process of deflation that trouble comes.

Then is the time to keep cool. When the sun is shining, and storm clouds are absent from the sky, and the barometer is steady, a ship's captain has a comparatively easy time, but when the storm breaks and the hurricane roars, and the ship is tossed and whirled about, it is essential that the captain remain cool and not whirled about.

"This old world is just now in a storm center." It is passing through it; in time it will emerge. But it is now that we must all keep cool; it is now that it would be fatal to be whirled about. The present is not the time to abandon the old charts which have guided us in the past. Now is not the time to throw the compass overboard, and trusting again the captain. When we have calmly and from the present difficulty we should, of course, take stock of our harrowing experience, and endeavor to devise ways and means to prevent or lessen the force of another such storm. But while the storm rages, keep cool.

Keep busy; work harder than ever before and work cheerfully, knowing that thereby the present task will be made the easier to bear; keep the faculty of understanding in full play; take alert advantage of every opportunity. Don't be stampeded and don't be discouraged. Let every one put his shoulder to the wheel and all push together.

To one and all, now and for every day of this year, is presented the admonition of the ancient Philistine leader: "Be strong, and quit yourselves like men."

Vast Gold Field in Japan

Mining Engineers Discover One Of Unprecedented Wealth

A gold field, which is declared to be of unprecedented extent and wealth, has been discovered in Formosa by mining engineers representing the Tokio Imperial University. Dr. Jisaburo Yokobori, head of the expedition, estimates the amount of gold available to aggregate \$2,500,000. The deposits, he said, extend for approximately 150 miles and are alluvial in nature. "I actually picked up gold dust in river beds, in the mountains, on the plains and even on the streets of small villages," Dr. Yokobori said.

World Wants More Gold

Gold is one commodity in which there appears no threat of a surplus. The world is constantly crying out for more. From Australia comes word that New South Wales has gone the length of bonusing the industry by paying half the actual working costs of prospectors and offering other inducements. It is said there are over 1,000 prospectors out in that state.

Nations Warned Against Russia

Trading With Soviets Provides Funds To Finance Revolution

A special cable from London to the Toronto Globe says:

"The President of the Bureau of the International Entente Against the World, through the Geneva press, against Russia's five-year plan. His pronouncement says in part: "Whoever buys goods coming from Russia helps to provide the Russian government with the funds which it needs to maintain its dictatorship and to finance revolution, in the purchasing country, as in others, takes advantage of the exploitation of the Russian people, and aggravates the shortage of food and other articles of prime necessity from which these people are suffering."

"Whoever sells to the Soviet government, directly or indirectly, receives in payment money of doubtful origin; contributes to the realization of the 'five-year plan,' a war machine of which the workers will be the first victims, directed against the prosperity of other nations."

Overwork or Worry

Taxes the Health of Thousands Of Young Girls

In the "teen-age" years when school or office work is exacting and outside activities use up so much energy, many girls undermine their health and spoil their happiness for years to come.

At such a time Dr. Williams' Pink Pills will be found most valuable. They purify and enrich the blood, build up the nerve cells and correct run-down conditions. Concerning them Miss Margaret Trevelyan, of the Toronto, Ont., says: "When I was attending high school I suffered a complete breakdown. My head would palpitate at the least exertion; I could not sleep and nothing I ate agreed with me. I began taking Dr. Williams' Pink Pills and before long I gained in weight and every distressing symptom left me."

Dr. Williams' Pink Pills are sold by medicine dealers or by mail at 50 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

Noise Has Been "Harnessed"

Acoustic Paint Assures Quietness In Toronto's New Bank Building

Once again science has mastered an ostensible physical impossibility. Since men commenced to erect their first buildings they have been confronted with the seemingly unsolved problem of control of acoustics. Prof. G. R. Anderson, of the University of Toronto department of engineering physics, has proven acoustics can be controlled and that bewildering noises and echoes can be eliminated from our buildings.

On the sixth floor of the new Bank of Commerce building, at King and Jordan Streets, Prof. Anderson demonstrated how special construction treatment can prevent any kind of sounds produced becoming chaotic, clamorous noises.

The great bank building will be the quietest office structure in Toronto. Rooms that have been structurally treated will be 30 per cent. quieter than the others, and it is predicted the efficiency of staffs will be enhanced 15 per cent.

Eradication of disagreeable noises is accomplished largely by the evolution of a new type of acoustic paint.

Miller's Worm Powders not only exterminate intestinal and other worms, but they are a remedy for many other ailments of children. They strengthen the young stomach against biliousness and are tonic in their effects where the child suffers from loss of appetite. In feverish conditions they will be found useful and they will serve to allay pain and griping in the stomach, from which children so often suffer.

Agriculture Needs Help

Ways and means have been devised for helping all the industries except agriculture. Thought should be directed at once to a policy that will bolster up farming. If agriculture can be made even tolerably prosperous all other industries will derive more benefit from the reflected prosperity than they could ever hope to enjoy from a tariff as high as the peace tower on Parliament Hill. — Farmers' Advocate.

What Price Glory

Judging from an incident which occurred recently at the Balfour Technical school, Regina, that city might still be in wastes of snow and ice, for all one gentleman overseas knows about it. The mailman delivered a science catalogue to the technical school mailed from London, England, advertising scientific equipment. It was addressed simply: "Science Master, High School, Regina, North West Territories." What price glory, Saskatchewan?

W. N. U. 1873

Five Boys—

Best Evidence.

Mrs. Corcoran, of Lethbridge, writes:—"I suffered with biliousness accompanied by sick headaches for days at a time, and every medicine I tried failed to bring relief. A friend gave me some of your wonderful Little Liver Pills and the first dose gave me great relief. For three years I have taken them every night as a regulator and they prevent these bilious and sick headache attacks. I have five little boys and I give them four or five every week. I have great faith in them. Take Carter's Little Liver Pills. All druggists 25¢ and 50¢ pkgs."

New Laws In England

Varied Collection Of New Legal Enactments Are In Force

Whatever New Year resolutions the English citizen may make, he will find himself facing a varied collection of new legal enactments.

The standard rate of income tax goes up another 2 1/2 per cent. on the more substantial incomes, though there is a reduction of the tax on incomes of the lowest categories.

The motorists encounter a sheaf of new requirements under the Road Traffic act, most important from a personal viewpoint being the compulsory insurance against third party risks. The speed limit is abolished for private cars and motorcycles. Hospitals will be entitled to charge up to \$125 for expenses incurred in treating accident victims. Hairdressers' and barbers' shops will close compulsorily on Sundays. Jewish merchants may operate on Sundays if they close on Saturdays. The Irish Free State incidentally is promoting a bill to make bartering a closed profession, to be followed only by legally recognized operators. In the Irish rural districts, it is understood, the frugal housewife frequently performs a rough and ready shingling upon her offspring of both sexes by slapping a pudding basin on their heads and shoving around the edges. Perhaps such offenders will be classed as out-laws.

New English legislation provides for different treatment of mental patients of varying degree. And a melancholy reflection upon the state of trade is the provision by which the government continues to pay health insurance contributions for some 100,000 persons out of work for two and a half years or more.

BREAKS UP GAS IN THE STOMACH
 Don't suffer from dangerous gas pressing around your heart, from sourness, acidity, bloating or pain of indigestion. Stop worrying. Whenever you need quick stomach relief, take a little Bismarck Magnesia—powder or tablets. It breaks up gas, neutralizes acids and keeps the stomach sweet and strong, and digestion perfect. At all good drug stores.

Furs a Necessity

Market For Furs Has Not Suffered During Hard Times

The success of any business lies in the market demand. It might have been expected that under existing depression fur farming would suffer heavily. For some reason, however, this has not been the case for good furs, even at the late winter sales, brought fair prices. From this it would appear that furs are more or less a necessity, particularly in the northern countries.—Animal Report, Federal Department of Agriculture.

Not Impaired With Age

In his early youth Mr. Mickleton had been a pretty child. His friends did not believe this was possible, and even he had forgotten all about it until one day he unearthed a painting of himself as a small boy from among the lumber. This he handed to his wife. "There, Sarah," said Mrs. Mickleton, proudly exhibiting the picture to the servant. "That is a portrait of your master, painted when he was a child." Sarah gazed open-mouthed at the production. "Oh, mum," she said, after some moments, "what a pity it is we have to grow up, ain't it?"

Remove all callouses and enlargements from your stock with Deane's Egyptian Liniment, a wonderful remedy.

"Some of the old songs will never die" says a musician. The fact that they are murdered with great frequency seems to make no difference.

Doctor Lives On Raw Food

Advocates Simple Diet In Order To Keep In Good Health

Hard times and unemployment distress could be greatly lessened, according to Dr. Julian P. Thomas, Winnipeg food specialist, because one bushel of wheat and one bushel of oats, together with a little fresh vegetable, would keep a man well nourished for at least a year.

In support of this startling assertion, Dr. Thomas cites an experiment performed by himself some forty years ago, when he lived on nothing but raw wheat and water for a period of thirty days. At that time the wheat cost \$1 per bushel. When he started the experiment, he had such a weak stomach that he could not eat sufficient ordinary food to keep going. On the raw foods he became so strong and healthy that he was able to turn his excessive energy into money.

Upon investigating the subject, he finds that some people in all of the nations have lived on raw food living, some of them attaining such old age that modern fables do not believe the accounts, even when they occur in the Bible. The fact is, Dr. Thomas was first induced to pay attention to his diet through reading the Book of Daniel. His first experiments were started years ago, and many people then laughed at his ideas. But all of these people are now dead, and he is still going strong, with the firm belief that he will live for one or two hundred years, and that each day of his life will be happy and vigorous.

Asthma Doesn't Wear Off Alone.

Do not make the mistake of waiting for asthma to wear away by itself. While you are waiting the disease is surely gathering a stronger foothold and you live in danger of stronger and yet stronger attacks. Dr. J. D. Kellogg's Asthma Remedy taken early, will prevent inflicting condition from becoming chronic and saves hours of awful suffering.

An Accurate Clock

Designed For Timing Football Matches At Highbury, England

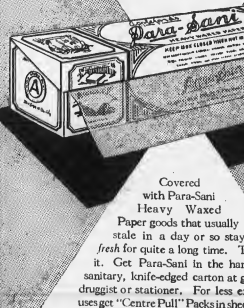

A novel clock has been installed on the football grounds at Highbury, England. It is a forty-two minute timepiece, and at half-time and time it sounds an electrically-worked whistle. From one to forty-five minutes are marked on the face in black. From forty-six to ninety they are in red. If a player is injured during the course of a match, the operator can stop the clock at once, for it is worked by ordinary clockwork mechanism. Thus, this clock can be adjusted so as to measure the exact duration of actual play. This mammoth timepiece weighs one and a quarter tons without its frame and is no less than eight feet in diameter. It has been designed for the sole purpose of making the timing of football matches as accurate as possible.

Natural Gas

The consumption of natural gas in Canada during 1929 for domestic purposes was calculated to be sufficient to displace 640,000 tons of coal.

Exports from the United States to the Orient are again increasing.

Prize For Timothy Seed

Robt. Cochrane Of Grand Prairie Awarded C.N.R. Cash Prize

In recognition of having won the world's championship for 1930 in timothy seed, Robert Cochrane, of Grand Prairie, Alta., has been awarded the special Canadian National Railway's cash prize granted at the Chicago international hay and grain show to the Canadian taking first place in that competition.

Announcement has also been made by R. English, of the Canadian National Agricultural Department, that the special prize for top place in alfalfa seed at the same show goes to Nick Chelise, of Ranier, Alta., who has been a winner in this field for some years. Cochrane, too, has been taking championships at Chicago for many years, the donors of the prize say, but this is the first time he has taken first place as a grower of timothy seed.

Friday the Thirteenth

There will be two more Fridays the thirteenth in 1931 than in 1930. Friday the thirteenth will fall three times in 1931, whereas in 1930 there was only one Friday the thirteenth. In 1931 there will be Fridays the thirteenth in February, March and November.

Four Day Mail Transmission Between Canada and Britain Coming As Aviation Progresses

Four day mail transmission between Great Britain and Canada is seen by post office officials as a reasonable expectation within the next year or so, while the development of aviation may find letters from London being delivered in Vancouver within two and a half days.

Discussing the future of aerial services, P. T. Coolican, deputy post-master-general, states that during some periods of the year at least the transference of mail from ship to plane in the Straits of Belle Isle should make it possible to land mail in New York ahead of trans-Atlantic liners entering that port from the British Isles.

While no announcement was made that the department contemplates inauguration of such a service, it was indicated considerable study had been given the project. A successful trial flight was made last fall when letters and newspapers were delivered to Premier R. B. Bennett on board the "Empress of Australasia" as the vessel went through the straits. This meant a saving of two days at least in transmission. Decision of the United States government to institute trans-Atlantic air flights via Bermuda and the Azores has led to consideration of possibilities of flights over the North Atlantic steamship track between Britain and Canada. Mr. Coolican drew attention to the fact that the flight from the Irish Coast to Newfoundland is shorter than the single leg between Bermuda and Azores of the proposed United States service. The project in the mid-Atlantic also involves overwater jumps from the coast to Bermuda and from the Azores to Lisbon. Furthermore, it was stated good conditions along Canada's eastern coastline are probably not worse than those in the neighborhood of Bermuda.

Even with the present cruising speed of airplanes it is calculated mail from London would reach Belle Isle in 20 hours. This would mean a service of 30 hours to Montreal, 40 hours to Winnipeg, and 50 hours to Vancouver. With aviation companies confidently predicting machines capable of a cruising speed of 140 miles an hour in a year or so, this time would be considerably reduced.

Turning towards Asiatic communication, post office officials visualize the possibility of stages which will take Canadian airplanes from northern British Columbia into Japan, touching the United States aviation bases at Unalaska in the Aleutian Islands, then following the Kurelle formed by this group and the Kurelle Islands into Tokyo.

Paid Taxes In Cabbages

German Farmer Received Last Notice and Had to Pay

The sauerkraut market in Holstein town of Heide, Germany, is badly congested because one farmer paid his taxes in cabbages instead of currency.

The farmer had been served with a "last notice to pay" whereupon he wrote to the tax collector that he had not the money, but was willing to pay in kind.

As he didn't receive a refusal, he loaded four tons of cabbages early one morning and dumped them in front of the tax office, with a note that he considered the claim settled.

Appointed To Vice-Presidency

Jack Miner, who runs the Miner bird reservation here at Kingsville, Ont., received word from Washington of his appointment to the vice-presidency of the American Poultry Association which has several hundred thousand members. George D. Pratt is the president.

Self-Government For India

Premier Ramsay MacDonald Speaks Of British Policy Of Freedom

In an address broadcast to the British Isles, India and North America, Premier Ramsay MacDonald traced the steps in India's march toward the goal of self-government which, he said, "for half a century responsible British statesmen have been assuring India was the purpose of our presence there."

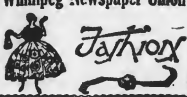

The premier said the conference had not been called because of recent incidents in India or because British government or Indian officials were showing weakness.

"These incidents rather have placed obstacles in our way," he said.

"Events have moved fast in India during the last few years," Mr. MacDonald said, "and it is unfortunate that a good deal of enthusiasm has been impatient and overdone the bounds of wise political activity. If we are to be turned away from our policy of freedom and justice because of destruction, it would mean that we would have to abandon the only way to settlement and order."

The premier added that unless Great Britain had intended eventually to permit India to have self-government, it should have seen that the effects of education of young Indians were piling up trouble for the government.

LOVELINESS ITSELF!

All Tingey models are created and sketched in Paris and the patterns are made in New York.

Nothing could be more luxuriously lovely than this sleekly flattering evening dress. It is feminine and graceful to a degree.

It is carried out in transparent velvet in striking indelible blue—has its rounded full and full-shaped skirt. Most proper evening dress of this type behave in this manner this season. Just as easily could the dress be carried out in lace, a very modish medium—or in almost any very soft falling evening tissue as crepe satin, chiffon, triple georgette or sheer metal lace, etc.

The slim circle is of self tissue and picot edged. Frills and edges can be picot-edged or finely bound.

This pattern may be obtained in sizes 16 to 20 and 36 to 40. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

Production Of Milk

Milk Production High In Saskatchewan During Month Of December

"Never do I remember the production of so much milk in the month of December of any year as there was recorded in December, 1930," O. W. Anderson, president of the Saskatchewan Co-Operative Creameries, said recently.

"The increase in production has pretty well settled the butter situation for the first time, since the announcement from New Zealand last fall. The new year is starting out better in the dairy business than the old year did," Mr. Anderson remarked.

Bankruptcy Laws Modified

Are Far Less Severe Now In Scotland and England

The laws of bankruptcy are far less severe on debtors than they used to be. At one time in Scotland bankrupts were compelled to wear a distinctive costume, and in England, until 1861, they were treated almost as criminals. So degraded was bankruptcy in general esteem that newspapers and magazines with pretensions to refinement, hesitated to print the word in full and when they did to use it, say in publishing a list of unfortunates compelled to file a petition, they did so under the heading "B-k-r-p-t-s."

Heavy Poultry Shipments

Prairie Provinces Enjoyed Good Trade During the Holiday Season

The Prairie Provinces furnished a large quota of the recent festive season's poultry supplies. Some 177,600 dressed poultry, making a total of 1,750,000 pounds, were shipped over the Canadian Pacific lines between December 3rd and 20th, inclusive. There were 36 carloads from Manitoba, 22 from Saskatchewan, and 16 from Alberta.

Japan is trying to stabilize the price of silk cocoons.

Bright Outlook For Canada

Optimism Expressed In Address Of Sir John Aird

Optimism in the future of Canada was the keynote of an address delivered at Toronto before chartered stenographic reporters' association of Ontario, by Sir John Aird, president of the Canadian Bank of Commerce.

Every confidence in the Dominion would survive the present economic depression with greater force than ever before, was expressed by Sir John.

With the help of British capital, he proceeded, Canada would excel the United States and ever be free of domination. The speaker also hoped with the readjustment of British war debts and reparations, British capital would once again flow into the Dominion.

"I do not think it is possible Canada could have a serious panic," Sir John declared. "In 1914, the government passed the 'Finance Act' which enabled Canadian banks to borrow as much money from the government as they desired, providing they got security. I think it is one of the best of the statute books."

Canada, in the future, will be the bread basket of the United States, the speaker predicted. The United States has devastated her lands, he declared, while the Dominion has developed a good diversified farming.

A New Brain Food

Given In Large Doses Sodium Bromide Has Good Effect

Sodium bromide, which looks and tastes like table salt, is the newest mental food.

This because sodium bromide has been known for mildly depressive or sedative effects. It was given in small amounts, three to five grains. But when tried in massive doses of 10 to 200 grains at a time upon mental patients at the Utica, N.Y., hospital, it produced marked improvement.

The psychologists conclude that the bromide's effects on the mentally diseased are associated to a large extent with speeding up of brain functions and to some extent with improved motor co-ordination.

These are group effects, that is, not all individuals were affected in the same manner.

Soviets Have New Law

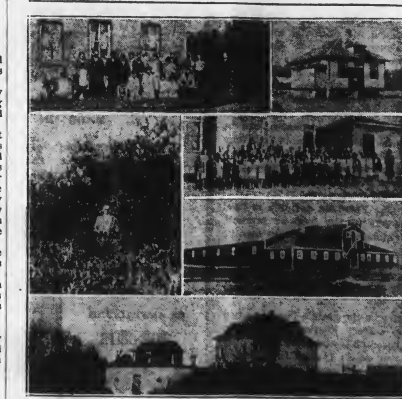

Killing one of your own pigs can be made quite a worthwhile event in the Soviet Union. It might, for instance, be worth two years' imprisonment or exile. Livestock isn't increasing at the rate the government would like, so the powerful Central Executive Committee has placed a ban on killing any livestock capable of reproducing.

Nancy—"This morning while I was practicing my husband threw a biscuit at me; a biscuit I made for him myself."

Sally—"The big brute. It might have killed you."

Many a man has a kick coming that never reaches him.

Winning Saskatchewan Communities in C.N.R. Progress Contests

Announcement of the results of the first year of the Canadian National Railways' community progress competitions for European settlements in Saskatchewan shows Edenwood, German settlement near Regina, won first place; Laird Meantonite community near Saskatoon, second; Bekever Hungarian community near Kipling, and Calder Ukrainian settlement near Yorkton, third; and Redberry Ukrainian settlement, near Yorkton, fourth. Pictures above show, left to right: (1) Judges visiting Louis Beilagh's farm home in Bekever; (2) Snow-bird school in Laird district; (3) An orchard scene on the farm of H. H. Funk in Laird district; (4) School at Calder; (5) Agricultural Hall in Edenwood; (6) Farm home of W. Winkler in Edenwood.

Hinterland Of Alberta, The Farthest North Part of Canada, Is Mapped From The Air

In striving to comply with the insistent demand for accurate maps, geographers and mappers now have the aid of the aeroplane plus photographic equipment. By this means 4870 square miles in the extreme northeast corner of Alberta, in the same latitude as Leningrad, Russia, has been mapped, in the Exploratory Edition of the Fitzgerald sheet of the National Topographic Series.

The new map, which is on a scale of four miles to the inch, is obtainable upon application to the Surveyor General, Ottawa, for the sum of twenty-five cents in sheet form, or for fifty cents, if on linen back or in folder cover.

A portion of Lake Athabasca occupies the southeasterly corner. In the fur-trading days this lake was about 70 days canoe travel from Fort William, the old capital of the Northwest Company. Now the aviator-surveys takes only as many hours to make the trip, including time for refuelling. By train and steamer seven days are required for this journey.

Slave River, connecting Lake Athabasca and Great Slave Lake, divides the Fitzgerald area into two distinct classes of country. To the west is an almost level plain with few lakes but many sloughs and hay meadows varied by sandy plains, in some cases grass-covered and with growth of poplar saplings. This is a natural range country. Horses and cattle from Fitzgerald and Fort Smith graze over it all the year round, and come out in the spring in splendid condition.

Here, too, is the last remnant of the wood buffalo. In the past few years blons from Buffalo National Park at Wainwright, Alberta, have been brought in and, together with the wood buffalo, are increasing rapidly.

All of the mapped territory east of the Slave River forms part of the great Precambrian shield, displaying rocky ridges and knolls with netted lakes between them. Along the river on this side is a forest of large spruce with jackpine on the ridges, and spruce, tamarack and birch in the hollows. Here is fair trapping ground into which hunters from Fitzgerald and Fort Smith penetrate.

Lake trout and whitefish are plentiful in contrast to the jackfish and suckers which frequent the waters of the portion west of the Slave River. Lake Athabasca yields quantities of whitefish, which are shipped in ice on the Slave River, to the Athabasca River to the south, and then loaded on express trains for Chicago and other outside points.

On Slave River between Fitzgerald and Fort Smith, a distance of 16 miles, is a series of potential water power in a series of rapids with a drop of 116 feet. These are circumvented by a good portage road served by motor trucks. A telephone line connects the two settlements.

Commenting on the timber along the Slave, Surveyor William Ogilvie, F.R.G.S., of Yukon fame, said that there was abundance of underbrush, alder, willow and hazel, including alders more than eight inches in diameter and 30 feet high, while willows were often a foot in diameter. Poplar exceeded 12 to 15 inches in diameter and grew from 100 to 120 feet high. In addition to the lumber obtainable from spruce, there is a supply of timber in this northern region for fences, buildings and fuel.

At Fitzgerald there are trading stores, warehouses, dwellings, a post office and a mission church. Here freight from the steamers is unloaded and re-loaded on trucks for the portage road to Fort Smith. Government administration buildings are located at the latter, with a mission school, church, stores, post office, wireless station and depot of the Royal Canadian Mounted Police. Both Fitzgerald and Fort Smith have a weekly mail from about April to November.

At the fort the Slave River is about a mile and a half wide. On the west side of the Slave River, opposite La Bette, about 34 miles in an air-line south of Fitzgerald, outcrops occur of about 10 feet of gypsum, overlaid by 20 feet of broken limestone. Between this and Fitzgerald are several other outcrops of gypsum on islands. The upper beds of these sections are used locally for making lime.

Southwest of Fitzgerald on the Salt River another deposit of 20 feet of gypsum is found overlaid by about 10 feet of dolomitic limestone. This escarpment extends northwestward for about 40 miles to the Little Buffalo River on the Peace Point map. The top of the escarpment is broken and pitted with sink holes in a way characteristic of a gypsum region. Varied and rich are the flowers of

the Fitzgerald country. Added to these are the blossoms of small fruits such as high bush cranberry, cherries, strawberries, wild currants, gooseberries, blueberries and raspberries. Wild fowl, fur-bearing and big game people the lakes, woods, and open wilds.

Market In France For Wheat

Expect That Imports For This Year Will Be Around 30 Million Bushels

The proposal on the part of the French government to fix the price of wheat in France at around \$2 a bushel would have no direct effect on exportation of Canadian wheat to that country. This was explained by people in close touch with the situation.

The object of the French government is to provide a price that will be profitable for the domestic growers of wheat. It is contended that \$2 wheat is necessary to encourage production in France. Should this price be fixed, the tariff imposed by France would be approximately equal to the difference between world prices and the French fixed price. The duty would be raised or lowered as world prices fell or advanced. The French government has authority to change its tariff in such situations by methods somewhat similar to orders-in-council in Canada.

The millers of France have estimated that it will be necessary to import from 25 million to 40 million bushels this year.

France has agreed with Canada to buy from seven and a half million to nine and a half million bushels of Canadian wheat each year. This undertaking is the first of its kind. It was arrived at as approximately two-thirds of the average importation from Canada during the past three years. A spread of two million bushels in the undertaking was made to take care of the varied requirements from year to year.

While the French government guarantees to take seven and a half million bushels, it is explained that this is the minimum. In the crop year of 1928, she bought 18 million bushels of Canadian wheat, and with France's requirements even greater this year than they were then, the impression is that her imports this year from Canada will be at least around 20 million.

Preventive Measures

Forty Thousand Lives Saved Every Year In Britain Through Increased Knowledge

Every year in Britain 40,000 lives are saved that would have been lost a generation ago. Declares Sir George Newman, chief medical officer of the board of education, in his new report on the health of school children. Nevertheless the rate of disease and disability among boys and girls of school age remains static. The population is being maintained by the enormous advance of preventive medicine and enlightened motherhood. Those two factors offset the decline in birth-rate. Sir George asks for a complete school dental service.

Soybeans In Canada

One ton of soybeans yields approximately 240 pounds of oil. In addition the resulting cake or meal has a high value for feeding cattle. This plant is chiefly cultivated in southwestern Ontario, but it is grown in all provinces and its production is increasing.

The Ubiquitous Canadian Strawberry The strawberry is found wild in Canada from the Atlantic to the Pacific, its range extending from the international boundary as far north as the 64th parallel, which is less than three degrees from the Arctic circle.

"You can't imagine how difficult it is to write on paper with a pen." "That's nothing. For six months I have been writing on the furniture with a nail." —Pages Gales, Yverdon.

Daily Mishaps

ZAM-BUK is a pure herbal ointment known all over the world for its wonderful soothing and healing properties. It quickly stops pain and irritation, always immediately relieves all kinds of aches and pains. Zam-Buk is as good for eczema, ulcers and piles as for the daily minor ailments such as burns, scalds, cuts, bruises or cold sores. A sample free and postpaid will be sent on application to Zam-Buk Co., Toronto.

Zam-Buk

Mr. Thomas Carpenter, 376 Third Ave., Verdun, Que., writes: "I have been a user of Zam-Buk for more than thirty years, during that time I have used it for cuts, bruises, chapped hands, skin troubles and rheumatism, and it has always given great satisfaction in healing wounds, and relieving pain. My personal opinion is that it is one of the best Ointments on the market."

WORLD HAPPENINGS BRIEFLY TOLD

Victoria, B.C. residents, by a 1,713 majority, voted against sale of beer by the glass.

British Columbia is planning a celebration for her diamond anniversary on July 20.

A series of mysterious disappearances of boatmen in southeastern Alaska is being investigated.

Mr. Justice Hyndman, of the Alberta Supreme Court has resigned to accept an appointment as head of the pensions appeal board at Ottawa.

The King lost one of his best friends in the death at London, England, of Sir Charles Cusht, equerry to His Majesty since 1892.

President Hoover may go to Ottawa to lay the cornerstone of the new legation chancery building, which the U.S. Government proposes to build.

Sir Francis Oswald Lindley, veteran of the British diplomatic service and ambassador to Portugal since 1929, is appointed ambassador to Japan.

World wheat production for 1930, exclusive of Russia and China, was estimated by the U.S. Department of Agriculture at 3,778,000,000 bushels, compared with 3,485,000,000 bushels in 1929, an increase of 8 per cent.

A 17-year-old boy was reported to have found at Larkville, Australia, a gold nugget weighing 78 lbs., and worth \$5,000 (about \$26,786). The nugget was said to measure 26 inches by 12 by 3.

The importance of a direct outlet to the Pacific Coast for the Peace River country was stressed by Herman Trelle, king of wheat growers, addressing the On-to-the-Peace Association at Vancouver.

The "Nautilus," the submarine in which Sir George Wyldes expected to reach the North Pole, has been taken from the Philadelphia shipyards to Camden, N.J. Sir George expects to start his trip the second week in March.

Is Cancer Caused By Cooked Food

Free Use Of Raw Fruits and Vegetables Is Recommended

(By Dr. Julian P. Thomas.)

Some forty years ago, then a professor of skin diseases in a southern medical college, I made some startling discoveries which enabled me to kill external cancer. Like many doctors making a specialty of cancer and other such troubles, I finally developed what was believed to be cancer in the stomach; and as I knew that there was no ordinary way to remove such a condition I began to use natural, uncooked foods such as fruits, nuts, fresh vegetables, etc., which apparently eradicated the trouble entirely. Many people heard of this strange experiment and, since then, many thousands of others have been benefited by my experience.

Today, deaths from cancer are increasing so fast that every man, woman and child is in danger, so that the discoveries I made years ago have become of great importance. All you have to do is to escape death from other causes long enough, and cancer is almost sure to get you. In fact, cancer and the sickness of premature old age are very closely connected.

For as long as the tissues can be kept young and healthy, cancer cannot develop in or on it. But when the body in general, or in part, becomes lowered in vitality, then look out.

Women are more prone to cancer than men, for it is said that 1 out of every 8 women, and 1 out of every 12 men, who reach the age of 40, develop cancer.

B.C. Coal

Oven Tests For B.C. Coal To Be Made At Winnipeg

Arrangements for oven tests of British Columbia coal by the Winnipeg Electric Company have been completed by Hon. W. A. Gordon, Dominion Minister of Mines, it is announced by Edward Anderson, K.C., president of the Winnipeg firm. The arrangement is in accordance with the policy of the Department of Mines, to investigate and test the various coals of the western provinces to determine their suitability for various purposes.

(By Eva A. Tingey.)

SMARTLY RUSSIAN

All Tingey models are created and sketched in Paris and the patterns are made in New York. A fascinating little dress is this, and one which has modish points and slimming qualities into the bargain! It has trims of eggshell silk pique which is so attractive against a dark ground, as was the case in the original model of wine red tweed mixture.

Such materials as supple velvet, chiffon velvet, marocain, wool crepe, wool jersey and canton crepe, etc., are stunning for this dress. Imagine for instance how lovely a soft green velvet with eeri or ocre lace would be, or black canton crepe with parchment tinted collar and cuffs. With either of these the belt buckle could be a modern design in enamel, metal, etc. The peplum flared cut "ten forme" not too full, with a waistline at low natural position, can be quite slimming to the hips.

This pattern may be obtained in sizes 14 to 20 and 34 to 40. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

Stinking Smut

By H. G. L. Strange, Director, Research Department, Seale Grain Co., Ltd., Winnipeg, Man.

Smut causes the farmer serious losses. Grain that even slightly smelly of smut suffers a deduction of from 6 to 8 cents a bushel, some years more, and a much greater loss is caused by smut because of the plants that are destroyed in the field.

Crops clean from smut can easily be grown and these serious losses avoided.

A little time and care—a very little money, is all that is required.

The following methods, if carefully followed, should ensure a crop free from stinking smut.

1. If grain is unmistakably smutty it should not be used for seed if it can possibly be avoided. It will be found to be far better to dispose of the smutty grain and to purchase new seed that is free from smut. (Good pedigree seed never was so cheap as it is at the present time.)

2. Should the seed be free from smut and from smut balls then either Formalin or Copper Carbonate can be used for treating wheat, but Formalin only should be used for oats and barley.

3. Copper carbonate cannot harm the germination of the wheat, and seed can be treated during the winter or at any time before seeding, but Copper Carbonate costs more than Formalin and should too much be used, then sometimes when the air is damp the feeding gears on the seed drill may become clogged up and the gear rods may twist and break.

Approximately two ounces, by weight, of Copper Carbonate to each bushel of wheat is the amount, but it must be very thoroughly mixed so that each kernel of seed is uniformly coated. A proper Copper Carbonate Treating Machine is the best method of mixing.

Wheat treated with Copper Carbonate properly in this manner can be expected to produce a crop free from smut provided the seed treated was practically free from smut and quite free from smut balls.

4. Formalin is cheaper than Copper Carbonate but it must be used only a few hours before the grain is seeded, and most important of all it must be used of exactly the right strength, no more, no less. Both the Formalin and the water must be measured accurately so as to obtain this exact strength.

Should the solution be even a little too weak, then the smut spores are not all destroyed. Should the solution be a little too strong, then some of the germinating power of the seed will certainly be harmed and so bushels to the acre will be lost in the field.

The correct strength to use is one Imperial pint of Formalin to 40 Imperial gallons of water, or one pound of Formalin to 30 Imperial gallons of water is the same proportion.

Most farmers use pails for treating their seed with formalin. Most pails hold either 12, 14 or 16 quarts.

For the 12 quart size one and one half ounces, by measure, of Formalin should be used.

For the 14 quart size one and three quarter ounces, should be used.

The 16 quart pail should receive two ounces of Formalin.

The size of the bucket can easily be determined by weighing. The water in a 12 quart bucket weighs 35 pounds. In a 14 quart bucket 35 pounds, and in a 16 quart bucket 40 pounds.

Note carefully that the ounces mentioned for Formalin are ounces by measure and not ounces by weight. There are twenty four ounces by measure in one Imperial pint.

To measure Formalin accurately a two or three ounce bottle or graduated measure or bottle marked with ounces and parts of ounces, can be purchased for a few cents from any drug store, or it is possible that a proper metal measuring cup may be obtained free from those selling Formalin.

5. The Formalin sprinkle method is the one usually used by farmers. It is quick and efficient if care is taken.

Put about 25 bushels, or less of grain in the front end of a clean wagon box, which is slightly tilted to the rear.

Throw on the grain a bucket or two of the correct solution of Formalin and water and shovel the grain over and over so as to mix the solution and shovel over again until the grain is uniformly moistened. This will take about one gallon of solution to each bushel of grain.

By placing a boiler, or bucket on the ground at the end of the wagon

Royal Bank Annual Meeting

At the annual meeting of the Royal Bank of Canada, the President, Sir Herbert Holt, referred to the world-wide depression, cited credit conditions as the chief controlling factor and reviewed developments in and prospects for Canadian industries.

He said that while the results of the Imperial Conference are naturally disappointing to the overseas Dominions, it was too much to expect that a ready-made proposal would be acceptable to Great Britain. Her trade with the outside world is relatively much more important to her than is the case with the Dominions, but forward by the Canadian delegates involved a principle rather than a plan and this principle is one which should command serious consideration. It is hoped that preliminary discussions before the proposed conference at Ottawa will lead to a common basis of agreement at that time.

Sir Herbert dealt with the principal industries of Canada, making a point of constructive suggestions. He strongly advocated that the west should be less dependent on the production of grain, substituting mixed farming. He approved of the suggested formation of an agricultural credit corporation by the farmers to purchase cattle, sheep and hogs.

He advocated the increased use of fertilizer as a means of ensuring more stable results, pointing out that experiments have demonstrated that fertilizers properly used will in-

crease the yield of wheat by eight to ten bushels per acre. The development of the Canadian livestock industry has not kept pace with general increase in production and we are steadily importing large amounts of butter and meat. In the meantime our exports of animal products have steadily decreased. His opinion statistics clearly point to an opportunity for greater profit by diversification.

In conclusion, Sir Herbert said: "The stability of our great industries and the strength of our financial institutions during the past year constitute a record which we may view with pride. It is this stability which is the basis for my optimism concerning the future."

Mr. C. E. Neill, Vice-President and Managing Director of the bank, confined his remarks to a discussion of the world depression and the relation of the price level to gold supplies and central bank policy. He pointed out that the return of normal international financial relations would end the present depression and he suggested a conference of the leading financial powers to formulate a plan to apply the necessary corrective measures.

The General Manager, Mr. M. W. Wilson, referred to the satisfactory manner in which the Canadian chartered banks have taken care of financial requirements in Canada during a difficult year, as clearly demonstrated that the Canadian banking system is adequate to the needs of the country in times of stress as well as under normal conditions.

These machines cost about \$35.00, delivered anywhere in Western Canada, and in addition to treating grain for smut with Formalin they do quite a good job in separating wild oats from wheat.

From my own experience, however, I strongly recommend all farmers who if they can help it, to use smutty grain for seedling purposes, but to discard the smutty grain and purchase new, clean, pure seed and treat with either Copper Carbonate or Formalin.

Do not depend upon the fanning mill to remove all smut balls. If grain with smut and smut balls must be used for seed, use the Immersion Method as described to get rid of the smut balls or else use an Immersion Pickler machine.

Conducts Exclusive Business

Man Keeps English Doctors Supplied With Russian Skulls

The claim that he is the only man in the world in his particular line of business is made by Herr Hugo Brech. He supplies English doctors with Russian skulls. "There is a steady demand for Russian skulls in good condition," Herr Brech said. "Because of the hard fare on which Russian peasants live their teeth are in very good condition, and the skulls are therefore invaluable for dental demonstrations. My firm collects the skulls in Russia, and it is my job to sell them to doctors. A good skull brings in about \$90."

The disadvantage of this method is that it is slow and not very convenient. A machine, however, has been devised which is called an Immersion Pickler which will treat grain by the Immersion Method quickly and eff-

ciently. These machines cost about \$35.00, delivered anywhere in Western Canada, and in addition to treating grain for smut with Formalin they do quite a good job in separating wild oats from wheat.

From my own experience, however, I strongly recommend all farmers who if they can help it, to use smutty grain for seedling purposes, but to discard the smutty grain and purchase new, clean, pure seed and treat with either Copper Carbonate or Formalin.

JESUS THE GREAT PHYSICIAN

Golden Text: "Surely He hath borne our griefs, and carried our sorrows."—Isaiah 53:4.
Lessons: Luke 4:37 to 5:39.
Devotional Reading: Isaiah 53:1-4.

Explanations and Comments

The Cure Of Peter's Wife's Mother, 4:38. — Leaving the synagogue where He had preached and had restored the demoniac to sanity, Jesus went to the house of Peter to find a greatly alarmed over the high fever of Peter's mother-in-law. They appeared to Jesus for help, and not in vain, for He stood over her and rebuked the fever, and she was so completely restored to health that she arose and ministered to them.

The Cure Of All Sorts and Conditions Of Ailments, 4:40, 41. — The fame of Jesus spread, and friends of the sick brought them to Him, and were not disappointed, for He healed them all. How did He do it? We cannot explain it. Dean Brown does so partially: "He aimed to secure the co-operation of the expectant hope and confident trust of the patient. He worked in atmosphere of sympathy. When He found His friends of the sick brought them to Him, and were not disappointed, for He healed them all. How did He do it? We cannot explain it. Dean Brown does so partially: "He aimed to secure the co-operation of the expectant hope and confident trust of the patient. He worked in atmosphere of sympathy. When He found His friends of the sick brought them to Him,

Don't Gamble With Health

We all know health demands absolute inner cleanliness. But what we often don't realize is the risk we take when we use harsh, gripping purgatives that create a strained, unnatural condition.

ENO is pleasant, gentle, safe and sure.

A daily dash of ENO'S "Fruit Salt" in a glass of water, morning or night, tones up and sweetens the entire system. Acid stomach, fatigue, biliousness, quickly disappear.

CHAPTER IX.—Continued.

"We've had dreadful bills these last two years, you know, I was so wretched before little Nick arrived that I had help with the housework all the time, and the nurse stayed six weeks instead of three. Nick just won't scrip at such a time; but the money melts away, and our old house always seems to need repairs. It's hard to save when you marry no young that there's no nest egg laid by for the emergencies that always come; and Nick's uncle left precious little beside the house. So I'll take your gift, Uncle Slim, and thank you gratefully whenever I spend a dollar of it.

She kissed him again, and Simon said, as she arose: "No need of getting so stirred up over a little matter of a hundred dollars. Now, dearie, you must go to bed. Maybe we better take the babies on a picnic tomorrow. If their daddy ain't 'goin' to be on hand. Seem's if I'd miss the boy full as much as they will."

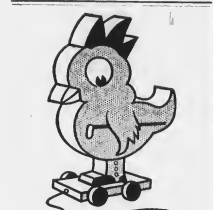

Later, when Gay stood at her window, ready for the night, she looked up at the stars, and wondered if Nick were looking at them, too.

"Good-night, dearest," she said, as if he were coming to carry across the miles. "I hope—I do hope you're missing me a little."

And at that very minute Nick was bending eagerly above a road map, a head crowned by wonderful, rippling hair, close to his own.

"It'll be a bully trip," he said, raising his eyes to meet the very blue and innocent ones beside him. "We'll come back through Anton Bay. The view from those hills is glorious. Gosh! It'll seem good to see something besides Bakersville or State Line!"

He arose, and, accompanied by a

Restless CHILDREN

CHILDREN will fret, often for no apparent reason. But there's always a reason. It may be the recipe on the wrapper; mild and bland as it tastes. But its gentle action soothes a younger more surely than a more powerful medicine.

That's the beauty of this special children's remedy! It may be given the tiniest infant—as often as there is need. In cases of colic, diarrhoea or similar disturbance, it is invaluable. A coated tongue calls for just a few drops to ward off constipation; so does any suggestion of fever. Whenever children don't eat well, don't rest well, or have any little upset—this pure vegetable preparation is usually all that's needed.

Fletcher's
CASTORIA

sleep Daddy'll be here. You take good care of Mother now, and don't let nothin' happen to her, will yer?"

"Nope," promised Sonny, and bravely swallowed a sob as the old man turned to put his cheek lovingly against the baby's, and to kiss Gay.

"You don't by no means feel nervous here alone, do you?" he asked anxiously.

It had been a beautiful day, but now the sun was behind a cloud, and a rumble of distant thunder stirred the air.

"No," Gay answered, "but I don't like your starting off if a shower's coming."

"It ain't aimed in our direction," said Simeon, studying the heavens, "but if it overtakes us we'll get shelter somewhere. You don't need to worry about us. There's Julie Nipps over on the Halliday's back porch. You tell her to come over here if the storm gets bad. She'll be company anyhow, and we'd ought to start right back. As 'tis we won't get home much afore dark."

"Then you mustn't loiter here, Uncle Slim; but I haven't thanked you for our visit, or said half enough for the wonderful gift. Next time you come to Bakersville I shall look like a bride!"

"You look like one now," said Simeon, "with yer eyes shinin' like that. Well, dearie, I must be gettin' on. Don't hardly know what Miss Bemis an' me'll do without you. Give my love to Nick, and tell him his property ain't deteriorated any since I borrowed it."

Gay laughed.

"I should say it hadn't! I feel like a new woman altogether, and the babies have never been so rosy."

As the car started she lifted her baby high, while Sonny clinging to her skirt, waved a farewell. Simeon craned his neck to watch the picture all the car turned into Main Street. The clouds had darkened suddenly, and the house seemed gloomy as Gay and the children went within.

She switched on a light for cheer, and looked about at her own beloved domain.

"Nick's done pretty well to keep things as neat as this," she commented, as she went to the kitchen to put away the milk and eggs. The remains of a hasty breakfast was in the sink, but except for the inevitable accumulation of dust, things were not hopeless. "In an hour I could do wonders," Gay mused, "but unless these clouds lift it's too dark to see, and I'll be frightfully tired by bedtime if I do too much. I'll just make the beds, and later on slick up the kitchen. The babies will be ready to turn in early. I wish" (with an anxious glance at the lowering sky), "I do wish Nick could come before dark."

She had started upstairs, the baby in her arms, when a voice at the door arrested her, and she turned to see Julie Nipps, the cap adorning her bobbed hair, slightly awry.

"I see you come home," she announced, stepping inside, "and thought maybe I'll cut 'em. I'll keep one eye out the window and if Miss Halliday gets back I'll cut 'em 'run through that hole in the hedge, an' I'll never know I left the house. Think o' her not lettin' me off when she's gone all day—and him not home either! Ah Sunday! I'd never stay there a minute except the pay's so good, and sometimes she gives me her old clothes. Say! that lightnin' somethin' fierce!"

(To Be Continued.)

Complete in Itself, Mother Graves' Worm Exterminator does not require the assistance of any other medicine to make it effective. It does not fail to do its work.

In quarries where beryl is found, workmen say that this mineral is a good prophet of weather changes, becoming deeper in color as humidity increases.

Australia's iron and steel production is increasing.

Canadian Newspaper Has Long Record

Brookville Recorder Celebrates Its 110th Anniversary

Started on January 16, 1821, by Chauncey Beach, an itinerant printer, the Brookville Recorder, a weekly newspaper, recently celebrated its one hundred and tenth anniversary without, so far as is known, having missed a week's publication during that long period.

The newspaper was established by members of the Bell family, acting in conjunction with Beach, as a protest against the Family Compact in Upper Canada, and Andrew N. Buell, later master in chancery at Toronto, who, as a law student, wrote the inaugural address in the first issue of 110 years ago, stamped the publication in the strongest terms as a reform journal. It has since remained a supporter of Liberal policies and principle.

Always on Hand

To be always kept on hand is a sure sign of appreciation of a medicine. Baby's Own Tablets hold this enviable distinction in thousands of homes from one end of Canada to the other. Mr. Ernest Galant, Sheldale, N.B., is one of the young mothers who appreciate the Tablets. She says: "Baby's Own Tablets are wonderful. I have used them for my little one for the past two years and would not be without them. They quickly banish constipation and colic and keep baby happy."

Baby's Own Tablets are a mild but thorough laxative. They regulate the stomach and bowels; relieve indigestion; break up colds and promote healthy sleep. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brookville, Ont.

Recipes For This Week

(By Betty Barclay)

BUTTERMILK BISCUITS

2 cups special cake flour, sifted.
1 teaspoon baking powder.
1/2 teaspoon soda.
1 teaspoon salt.
2 tablespoons butter or other shortening.
1/2 cup buttermilk or sour milk.
1/2 pound pimento cheese.
4 tablespoons butter.
Sift flour once, measure, add baking powder, soda, and salt, and stir again. Cut in 2 tablespoons shortening. Add buttermilk gradually until soft dough is formed. Roll 1/4 inch thick on slightly floured board. Cut with floured biscuit cutter. Place in greased pan. Melt cheese and 4 tablespoons butter and pour mixture over biscuits. Bake in hot oven (425 degrees Fahrenheit), 12 to 15 minutes. Makes eighteen 1 1/2 inch biscuits.

ORANGE TAPIOCA PUDDING

1/2 cup quick cooking tapioca.
2 cups milk.
2 eggs.
1/4 cup sugar.
1/4 teaspoon salt.
3 oranges.
2 tablespoons sugar.
Put milk and tapioca in double boiler; cook fifteen minutes; then add eggs, beaten with salt and one-half cup sugar. Pare oranges; remove sections from membrane; put in bottom of baking-dish; sprinkle with two tablespoons sugar; pour tapioca mixture over oranges, and bake in moderate oven until custard is firm.

Toothache and neuralgia are instantly relieved with Douglas' Egyptian Liniment. A quick, sure remedy. Also recommended for burns, sprains, sores and inflammation.

Canadian Indian Education

In the Dominion of Canada there are now 350 centres of Indian education activity—78 residential and 272 day schools—under the Department of Indian Affairs.

This much can be said for these depressed times, says the Ottawa Journal, that the Indian doesn't know how about selling you a necktie out of the window.

Add to sportive youth: Remember, my son, many a man has to live on porridge because he sewed nothing but wild oats."

A Law-Abiding Town

Nothing Exciting Ever Happens in Lonsburg, Nova Scotia. That Lonsburg, Nova Scotia, is one of the most peaceful and law-abiding on the continent may be seen from the following facts:

During the year 1930 there was not a single arrest for drunkenness, theft, assault or any similar charge. It was not necessary to call one session of the police court during the year.

Although automobile traffic showed a marked increase over other years, no accident resulting in death or injury to any person occurred.

During the past three years no arrests have been made for drunkenness.

No citizen of Lonsburg within the last ten years has served a sentence in the county jail or appeared in either the county or supreme courts on a criminal charge.

When the Nova Scotia Temperance Act was in force, Lonsburg had no government vendor and no attempt was ever made to appoint one.

Under the present government control act, no liquor store has been opened in Lonsburg. When the plebiscite on the liquor question was taken, the town voted two to one against government control.

Queer Lake In Italy

Mysterious Motions Tally With Activities Of Volcano

Considerable curiosity has been aroused in Italy by the phenomenal behavior of a lake situated some 20 miles north of Rome at Lepignano, the lake being swallowed up by the earth for over two hours and then rising to its normal level. The volcanic character of the lake had long been noticed, and it has been discovered that its mysterious motions tallied with certain activity of Vesuvius over 200 miles to the south. Data is being collected by which this lake may be used as a signal of approaching Vesuvius eruptions. Preceded by a brief earthquake shock, also experienced at Vesuvius, the waters of the lake began to fume and boil. The water sunk into the earth through volcanic fissures, and after the bottom had been dry for a little over two hours, the lake refilled with turbulent hot water and sulphuric vapors. The waters of the lake cover some ten acres.

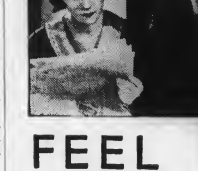

Acids In Stomach Cause Indigestion

Medical authorities state that nearly nine-tenths of the cases of stomach trouble, indigestion, sourness, burning, gas, bloating, nausea, etc., are due to an excess of hydrochloric acid in the stomach. The delicate stomach lining is irritated, digestion is delayed, food sour, causing the disagreeable symptoms which every stomach sufferer knows so well.

Artificial stimulants are not needed in such cases and may do real harm. Try having acids all digestive aids and instead get from any druggist some liquid Magnesia and take in water right after eating. This sweetens the stomach, prevents the formation of excess acid and there is no sourness, gas or pain. Dissolved Magnesia (in powder or tablet form—never liquid or milk) is easiest to take and is the most efficient form of magnesium.

Take a tablet or two before your meals with no more fear of indigestion.

A trans-Atlantic liner being constructed at Belfast, Ireland, will carry 1,500 passengers.

FEEL MEAN?

Don't be helpless when you suddenly get a headache. Reach in your pocket for immediate relief. If you haven't any Aspirin with you, get some at the first drugstore you come to. Take a tablet or two and be rid of the pain. Take promptly. Nothing is gained by waiting to see if the pain will leave of its own accord. It may grow worse. Why postpone relief? There are many times when Aspirin tablets will "save the

Acute Gastritis

Gets a Knockout

Mr. Arthur E. Root, of West Croydon, writes: "Discharged from His Majesty's Forces with acute gastritis, I was left with a very weak frame, and those who suffer similarly know how very careful one must be in what they eat and what medicines they take. Constipation and indigestion generally commenced my attacks; headaches and bad breath naturally followed; but to-day I am able to eat anything I fancy. My secret I can honestly recommend, lies in your pills." Take Carter's Little Liver Pills. All druggists 25c and 75c red pkgs.

Little Helps For This Week

"Lord, increase our faith."—Luke xlv. 5.

The billows swell, the winds are high, Clouds overcast my wintry sky; Out of the depths to Thee I call, My fears are great, my strength is small.

O Lord! the pilot's part perform. And guard and guide me through the storm. Control the waves, say, "Peace, be still." —William Cowper.

If, like Peter, we fix our eyes on Jesus, we too may walk triumphantly over the swelling waves of disaster, and unfettered amid the rising winds of doubt; but if we turn our eyes away from Him in whom we have believed, if, as is so easy to do, and as we are so much tempted to do, we look rather at the power of those terrible and destructive elements than at Him who can help and save, then we too shall inevitably sink. —Frederic W. Farrar.

War Debts Cause Trouble

Aftermath Of Great War Retards International Trade

Time, the great healer, will remedy many ills, but the financial aftermath of the Great War will not cease to check and retard international trade relations if the nations do not take the initiative of removing or alleviating the difficulties, declared Senator F. L. Belque, president of the Banque Canadienne Nationale, in delivering his annual address to the shareholders of that institution at Montreal.

"It seems beyond question," declared the senator, "that alleviation of the war debts would be a practical and most constructive contribution to resumption of normal economic activity throughout the world."

Take Precautions

Potato bugs that spend the winter underground take "anti-freeze" precautions, by getting rid of one-third their weight in water, which otherwise would freeze and burst the body cells.

Money talks—but to the Spend-thrift it says only, "Goodbye."

day." They will always ease a throbbing head. Quiet a grumbling tooth. Relieve nagging pains of neuralgia or neuritis. Or check a sudden cold. Even rheumatism has lost its terrors for those who have learned to depend on these tablets. Gargle with Aspirin tablets at the first suspicion of sore throat, and reduce the infection. Look for Aspirin on the box—and the word Genuine in red. Genuine Aspirin tablets do not depress the heart.

J. M. Allan Phone 32

Alex. Morrison, of Coleman Garage and Sentinel Motors, states that though sales are less than in normal times, yet the automobile plays such an important part in daily life that the temporary lull in business will not seriously affect the 'automobile industry'. It has undoubtedly helped to bring prices down and the public will benefit. Better values can be obtained now in new or used cars than at any time on record in the automobile industry.

Personal and Local

Wilfrid Dutil and Henry Thibault took a jaunt to Lethbridge yesterday afternoon.

Pattinson's hardware store is offering some exceptional bargains in Simmons bedsteads complete at \$22.50. Buy now and save.

C. J. Tompkins was a visitor in Coleman last Saturday and is getting back into his regular routine as district representative for the Sun Life Assurance Co., following his recent accident.

Mr. Melville Anderson, of Anderson & McLean, sight specialists, of Calgary, announces next visit to G. R. Powell's, Coleman, Tuesday, Feb. 3rd. 20 years experience in regular visits assures you of satisfaction in all optical work.

Crying towels are being handed out to those who are mourning the loss of business. The sad-eyed one is instructed to go into a quiet spot, have a good cry, and then possibly after ridding himself of copious tears, his head will be sufficiently cleared to permit him to engage in creative effort to stimulate business.

Dan Morrison says "Mr. Cote had better tell it to the mighty ones at Ottawa when he talks of deflating the value of the Canadian dollar." As Dan can analyse the financial page of any daily in Canada as quickly as a baseball or hockey fan sums up the sport page, he apparently knows whereof he speaks.

One Thing Brings Up Another

(Continued from Page One)

Thursday afternoon. Witnesses heard were Paul Churka, Mike Klish, Trokin Bielik, Wm. Caspar and J. Radzko.

Following the addresses of the prosecution and the defence, Biendo was adjudged guilty of assault by Magistrate Gresham and fined \$10 and costs, or 30 days.

The case was not without its humorous side. The affray which formed the basis of both actions occurred at the close of an afternoon when, it was stated in the evidence, Biendo and some friends had been having a few friendly glasses of beer. An alleged theft of sausages by Andrechuk from Biendo had been bandied about between parties known to both, and Biendo, meeting Andrechuk, engaged in an altercation in front of Ledieu's store, in the presence of the witnesses named above. Evidence on the actual fight was contradictory, and the prosecuting lawyer described the evidence of one witness as a tissue of lies.

One witness stated he could not tell what the combatants were saying to each other. He knew they were angry, but each was talking his own language. Andrechuk on being attacked uttered the words "Nechipsay Manca." These words mystified the court, as the witness who stated he heard them said they meant something very bad. On being interpreted into English they meant nothing more than "keep away from me!"

The new 1931 Pontiac cars are on sale at Coleman Garage at less than the price at which any previous Pontiac was introduced.

Motor car owners have derived full value from their cars this winter. Good roads and good weather have combined to make it a pleasant winter for motoring. Gasoline sales undoubtedly will have increased compared with previous winter seasons.

The story of the sausages was for some time shrouded in mystery, until the prosecuting lawyer asked point blank for one of the witnesses to tell the court all about the sausages. When the story was told, it was still as vague as ever, being told through an interpreter. Andrechuk claimed he was assaulted again later in the evening, but this was not substantiated. A witness stated he met Andrechuk near the rink about 9 p.m., who told the witness he was being chased, and that someone had thrown a brick at him; then he quickly disappeared down by the railroad tracks.

In addressing the court the prosecution stated that Biendo was the worse for drink, and had passed an insolent remark to Andrechuk about the sausages which was very much resented. Then Biendo punched him, though some witnesses said he only pushed him. Though Andrechuk did not want to fight, Biendo had followed him up, provoking a quarrel, and therefore was guilty of assault.

Magistrate Gresham with very little hesitation declared Biendo guilty. Andrechuk of course remains on bail on the original charge of stabbing.
